Questions and Answers – Storage Servers

1. How was the 40.55TiB calculated (is that effective capacity after the 5:1 duplication/compression, etc.), what networking connectivity is needed, power requirements, and service level and length (such as ProSupport 4hr 3 years)?
 - A. **This is before compression. We want something comparable to our 14 3.84tb drives in each of our current servers. Dual 208v ac power supplies. We need 2X4 PORT 10GB ISCSI/ETH TWINAX IO. We want ProSupport 4hr for 3 years.**
